

Importance of Patenting

A workshop on the importance of patenting was held on 19th April, 2016 in the auditorium of the institute. The morning session constituted of a presentation by Miss Kompal Bansal (Patent and Trademark Attorney) of Corporate Consultants. The students of first year attended the workshop. Through her presentation she motivated the first year students to carry out innovative research followed by the patenting of the same.

She expressed her concern that though we have many new ideas and sometimes we also make some new products through those ideas, but we don't go for protecting our rights. So she emphasized that we need to protect our rights by filing our work through patents. Followed by her lecture principal also gave a motivational speech to the students. Dr. Niraj Bala head of Research and Innovation center delivered her vote of thanks in the end.

After lunch the team from the Patents consultants had one to one interaction with the students and staff willing to patent their work. The Patents inventors willing to file patents interacted with the consultants in the RIC Lab. They discussed the problems they were facing in the documentation of the patent work.
